CORSIA Timeline 2022

CORSIA Periodic Review 2022

Regular review

According to Assembly Resolution A40-19, Starting in 2022, the Council will conduct a review of the implementation of the CORSIA every three years, including its impact on the growth of international aviation

Adjustments

The review serves as an important basis for the Council to consider whether it is necessary to make adjustments to the next phase or compliance cycle and, as appropriate, to recommend such adjustments to the Assembly for its decision

CORSIA Periodic Review 2022

The periodic review will also include:

ASSESSMENT OF	progress towards achieving the ICAO’s global aspirational goal; the scheme’s market and cost impact on States and aeroplane operators and on international aviation; and the functioning of the scheme’s design elements;
CONSIDERATION OF	the scheme’s improvements that would support the purpose of the Paris Agreement, in particular its long-term temperature goals
UPDATE	the scheme’s design elements to improve implementation, increase effectiveness, and minimize market distortion, taking into account the consequential impact of changing the scheme’s design elements, e.g., to MRV requirements
SPECIAL REVIEW	by the end of 2032 on termination of the scheme, its extension or any other improvements of the scheme beyond 2035, including consideration of the contribution made by aircraft technologies, operational improvements and sustainable aviation fuels towards achieving the ICAO’s environmental objectives

Next Steps – Working Together

Assess the readiness in terms of CORSIA implementation

- ✓ Questionnaire distributed in advance
- ✓ Bilateral outreach

Identify the areas of improvement

Consider engaging with the national stakeholders (Government agencies/Ministries, aeroplane operators, potential verification bodies, national accreditation bodies..)

Adjust the details of the Work Plan in accordance with the feedback
