

## HAILU T. TEKLEAB

Hailu T. Tekleab is currently working at the Ministry of Water and Energy of Ethiopia, responsible for Biofuel Development. He is working as a Director of Biofuel Development Directorate in the MoWE. He worked as a Director of Environment and Climate Change at the Ministry of Mines and Petroleum. He also worked as a Director of Petroleum Downstream Operations Regulatory Directorate at the MoMP. In addition to this he showed his best performance in international and national organizations. He also played a role for climate change adaption and mitigation actions while working for these institutions. Some of his expertise includes: Biofuel development in the nation; prevention and mitigation of environmental and social risks in mining, petroleum, water and energy operations. He worked as a national consultant in UN organizations (FAO and UNDP) and other private Engineering and architectural firms in survey, design, construction, supervision, procurement and contract administrations on building, road, urban development and water projects.

He received his Master's degree in Project management, BSc in Architecture & Urban Planning and has a college diploma in civil engineering.

Hailu spent his life practicing in Engineering, Architecture, GIS & RS, ICT, Environment and Energy related areas. He dedicated his time to alleviate environmental problems and climate change issues. Hailu lives with his wife, young daughter and his mother.
