

## DIMITAR NIKOV

Mr. Dimitar Nikov is a senior policy officer in Directorate-General for Climate Action at the European Commission. He is a French civil engineer and has worked since 2009 mainly in the field of international climate negotiations (including COP21 Presidency), carbon pricing instruments and greenhouse gas emission reduction projects in Europe and abroad.

In the recent years, he negotiated and co-facilitated number of agenda items under the UNFCCC. Currently, he is member of the Technical Advisory Body (advising on eligible units under CORSIA) under the ICAO Council and his focus of work includes carbon pricing, mitigation of non-CO2 emissions of aviation (responsible for 2/3ds of the global climate impact of the sector), as well as emissions from the space programme and related operations.
