

SUSAN NAMBUSI

Susan Nambusi is an Aviation Environment specialist with a focus in Fuel Data Analysis, Fuel efficiency and Carbon emissions reduction at Kenya Airways where she drives resource and process optimization through recommendation of policy and process improvement. She oversees Kenya Airways critical data collection and coordinates with the Kenya CAA in the review of the State action plan for CO2 mitigation activities in accordance with Doc9988.

Her tenure has seen the airline achieve savings and reduce carbon emissions, through various fuel saving initiatives.

She is a licensed Flight Dispatcher with over 10 years extensive technical knowledge in Boeing and Embraer aircraft performance which has complemented her current role.

Currently, Susan sits as the Vice chairperson of the AFRAA Fuel committee, where she champions fuel negotiations for member airlines, according them favorable fuel prices and terms. She also shares her expertise as an observer, in the IATA Sustainability and Environment Advisory Council (SEAC), and as a member of the ICAO Committee on Aviation Environmental Protection (CAEP) LTAG task group.
