

AÏDA DIONGUE-NIANG

Aïda Diongue-Niang is a meteorologist/climatologist with a PhD on the variability of the West African monsoon. She is a lead author of the Intergovernmental Panel on Climate Change Sixth Assessment Report, the Physical Science Basis of Climate Change Report published in August 2022, and the forthcoming Synthesis Report. She has worked at the National Weather Service for nearly 20 years in research, operations to improve weather forecasts and warnings, and service delivery. She has held various leadership positions including Director of Meteorology, Technical Advisor at the National Civil Aviation and Meteorological Agency where she was responsible for, among other things, structuring the implementation of the National Climate Services Framework which aims to provide science-based information for the reduction of impacts and risks from climate change and variability.

She is currently working at the Senegal country office of the Global Green Growth Institute (GGGI) as Deputy Country Representative for one year (August 2021-July 2022), in particular to assist the Government of Senegal, through its implementation unit, the BOS-PSE, in structuring the "Green Senegal Emerging Plan", in line with Senegal's commitments to climate and nature and taking into account Senegal's vulnerability to climate change and biodiversity loss and socio-economic changes.
