

# WONDIMU MATHEWOS

**Wondimu Mathewos has a Bachelor degree in Electrical & Computer Engineering & MSc Candidate. Currently, he is working as Senior Project Engineer in MRO Engineering at Ethiopian Airlines Group.**

- Conduct research on new development in the aviation industry and feasibility study on airframe maintenance capability development for Ethiopian Fleets.
- Coordinates the preparation of plans, evaluation and determination of the level of airframe maintenance requirement for different aircraft in the airline possession.
- Develop capability for third party maintenance work in conjunction with Ethiopian MRO marketing. In parallel, I work in different strategic projects like European Union Aviation Safety Agency - Design Organization Approval (the one we currently secured Ethiopian Design Organization), and chairing Sustainable Aviation Fuels Roadmap Development from the Ethiopian Airlines side.
- Work on aviation emission reduction strategy team to carry out the tasks in a way that benefit the airline
